

## Recorder Anthology book 3 amendment

Telemann's Andante from *Sonata in A minor* is listed in our syllabus and in our Recorder Anthology book 3 as being suitable for both descant and treble recorder, however the first impression of the anthology contained a version only suitable for descant recorder (specifically relating to bars 4-5) In subsequent reprints this error will be corrected with the following change, which can be annotated into any existing copies.

Treble recorder
